

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

INTRODUCTION

I have come to regard a book as curtailed of half its value if it has not a pretty full index.—BINNEY.

For a work of such wide scope as The Library of Universal Literature a comprehensive index is indispensable. Though the work is encyclopedic in character, and for this reason arranged alphabetically for convenient reference to authors, it is more than an encyclopedia of writers. Were the articles limited to biographies this alphabetical arrangement would answer the purpose of the most exacting student.

But in the compilation of this work the editor has done more. He has classified the writers according to their works, made selections from their best books. and culled opinions from able contemporary and subsequent critics to show their relative merits. Many who are known to the world in general as romancists have, on the close scrutiny to which they have been subjected during the compilation of this work, been found to have produced poetry, critical essays, or contributions to science or history which might have made them famous in those lines had not their greater works overshadowed others of real merit. Many a noted philosopher might be considered a great wit could we but lose sight of his sage sayings. In classifying the various authors it has therefore been found necessary frequently to place the same name under several headings, so the inquirer may not be at a loss to find the name of a poet under the proper classification, even though he also be known as a novelist. This section of the index will be found of great value to anyone searching for writers in the several departments of literature.

The collection of excerpts from the principal works of the authors represented would lose more than half its value without being indexed. It will be found by reference to this index that many subjects are treated of by different authors in different parts of the work, and where one might scarcely expect to find them without such reference. The selections also comprise much biographical matter and critical opinions of authors not found in the regular alphabetical order. For the purpose of compiling theses, essays or sermons, or for strengthening one's own opinions by getting the matured thoughts of others on the same questions, it will be readily seen that this section of the index is invaluable.

Though the title of each extract has been written with a view to suggesting the tenor of the article, it frequently transpires that the heading (often the author's own and selected at his caprice) indicates neither the character of the writing nor the subject treated. The present editor thought it expedient therefore to further set forth the titles to the extracts in an Analytical Index, wherein the selections are grouped under several general headings, to indicate either the subject-matter or the rhetorical character of the writings. In making this analysis of the selections, the poetry, in which the work is exceptionally rich, has been grouped into verses suitable for quotation on various occasions and on the subjects usually sung of by the bard, such as "Love," "Patriotism," "The Sea," "Death," etc. It is hoped the need of ready reference to appropriate quotations will be filled by this section of the Index.

The Index of Bibliography is a compendium of the world's literature. What studious reader has not felt the necessity of such a work! It is evident that to read all the works on one subject (unless it be a trifling one) is impossible, even for a specialist. But by reference to this Bibliographical Index the choice of several may be made, and possibly one by an author acknowledged to be the master in his line.

Description of the Index is not complete without a brief reference to the synchronistic charts. As chronology is the framework of history, so synchronology is the skeleton of literature. The value of many a book is determined by the circumstances under which it was written. A careful study of these tables will disclose the gradual unrolling of the scroll of literature in the light of civil and political history, as well as the effect on literature of the world's progress.
